Six Sigma Green Belt *(Certification Training Course for Project Leaders)*

This blended learning course includes 24 classroom hours and 22 hours of interactive and dynamic online instruction featuring voice over and closed captioning. In this training, participants will learn the tools needed to define, measure, analyze, improve and control a Six Sigma project. There will be a certification exam. Class materials will be distributed during the class. Upon successful completion of on-line modules and final exam, participants will receive a CVCC Six Sigma Green Belt Certification.

Wednesdays beginning January 27, 2010

**CVCC East Campus Room 956 –
