

To reduce carbon emissions by reducing the number of vehicles driven on campus, the College has designated limited parking spaces for carpoolers and vehicles using alternative fuels. These parking spaces are marked as "Reserved Parking Carpool Only or Alternative Fueled Vehicles only". The reserved carpooling spaces are for vehicles occupied by more than one person or vehicles using alternative fuel sources. As encouragement in assisting the College in meeting its sustainability and carbon emissions goals, these spaces are closer to the entrance of buildings. Parking in these designated spaces is on the honor system but will be monitored by campus security.

Cars parked in one of these reserved spaces which do not meet the above qualifications will receive a parking violation and incur a parking fine.
